PROFILE SUMMARY

Aspiring C Developer with prior experience as an Analyst, aiming to leverage analytical thinking, debugging skills, and strong fundamentals in C programming to contribute effectively to software development projects while growing as a developer.

EDUCATION

GMR INSTITUTE OF TECHNOLOGY Razam, IN
Bachelor of Engineering 2019 – 2023

Major in Information Technology
Cumulative GPA: 6.2
Relevant Coursework: C Programming for Problem solving, JAVA, Machine Learning, Artificial Intelligence.

WORK EXPERIENCE

GLOBAL LOGIC Hyderabad, IN
Associate Analyst 2024

Amazon - General Static Process (GSP) [Client Project]:

Trained models to generate appropriate and policy-compliant responses for user prompts, contributing to the development and implementation of the GSP

GSP. Google - Face Next [Client Project]:

Collaborated on training image recognition models to categorize content ensuring accurate classification and adherence to safety standards.

Google - Cloud LLM [Client Project]:

Currently contributing to the development of a Cloud-based Large Language Model, including fine-tuning Gemini for digital marketing capabilities within Google's VEO2 product, focusing on the accurate and guideline compliant generation of multimedia content (video, audio, images) from prompts.

UNIVERSITY PROJECTS

FOREST FIRE DETECTION USING DATA MINING

- By analyzing historical and real-time data, the project seeks to develop an accurate and timely system that can identify potential forest fires.
- This approach could significantly improve early detection and response, minimizing the impact of wildfires on ecosystems and communities.

STUDENT MANAGEMENT SYSTEM

- A console-based application to manage student records such as adding, viewing, searching, updating, and deleting student details using C.

REVVING UP THE WEB: Designing a Modern Website for Jaguar

- Made a website for a car company using HTML, CSS, and JavaScript. It's easy to use and shows car models interactively.
- Added tools to compare cars and schedule test drives online. The design is simple and easy to navigate and made the website load fast on all devices and easy to use for everyone.
- These improvements make it easier for people to explore cars and book test drives, helping the car company grow.

CERTFICATES

- Data analytics and Visualization job simulation.
- Ethics in the Age of Generative AI.
- Software Engineering Job simulation

ADDITIONAL

Technical Skills: C, C++, Machine Learning, Power BI, MATLAB, Data Analysis, Git, Postman, HTML, CSS, Java Script.
Languages: Fluent in English, Telugu; Conversational Proficiency in Hindi.
Personality Traits: Quick Learner, Team player, Hard Working
